 - 4.6.4 Borrower shall not have filed bankruptcy, or received a bankruptcy discharge, in the last three (3) years prior to date of application.
 - 4.6.5 Homeowner Eligibility – the Housing Rehabilitation Loan Committee (HRLC) will consider applications on a case by case basis. - 4.7 If at any time the Borrowers filed bankruptcy that resulted in a discharge of any debt owed to City of Modesto, or the former City of Modesto Redevelopment Agency, for housing rehabilitation or down payment assistance, the HRLC shall evaluate the circumstances of the bankruptcy in order to determine if further assistance may be provided without further risk to funding investment.

If the project *will not* disturb any painted areas, the case file shall be so documented and the property owner or tenant advised in writing. No additional compliance steps with lead based paint regulations are required.

25.2.4 Repair Work: If the project *will* disturb paint, then the City will require the rehabilitation contractor to be certified as a lead based paint abatement supervisor or as a certified lead safe worker; or the rehabilitation contractor will secure a certified lead base paint abatement supervisor to monitor safe work practices in those areas where painted surfaces will be disturbed by the rehabilitation work. Safety precautions for occupant protection ((§35.1345), work site preparation and cleanup activities and

prohibited methods of removal (§35.140) of lead base paint materials must be followed.

25.2.5 De Minimis Levels: Safe work practices are not required for projects which are determined to disturb surfaces below *de minimis* levels (§35.1350). The case file shall be documented and a Notice of Completion and Notice of Clearance is not required.

25.2.6 Notice of Completion and Notice of Clearance: A clearance examination of the work site (the area in which the rehabilitation construction was performed) is the responsibility of the rehabilitation contractor and must be performed by a certified lead based paint inspector/assessor. Once work is completed, the City will provide the owner a report entitled “Summary Notice of Completion Lead Base Paint Hazard Reduction Activity” within fifteen (15) days of the completion date (the date on which clearance is achieved). The lead base paint inspector/assessor will provide a copy of the results to the City who will notify the owners of the property with the “Summary Notice of Lead-Based Risk Assessment.”

25.3.6 Interim Controls: If the risk assessment indicates the presence of lead base paint then lead hazard mitigation activities, including paint standards, interim controls and paint stabilization must be performed on all identified lead paint hazards in accordance with §35.1330. Safety precautions for occupant protection (§35.1345), work site preparation and cleanup activities and prohibited methods of removal (§35.140) of lead base paint materials must be followed.

25.3.6.1 A person performing paint standards, interim controls or stabilization must be trained in accordance with 29 CFR 1926.59 and be a certified lead base paint safe worker or certified lead base paint abatement supervisor.

25.3.7.1 Safe access to sleeping, kitchen and bathroom facilities can be provided in another convenient location outside of the work site, thereby avoiding unnecessary relocation of residents.

25.3.8 Clearance: Clearance shall be the responsibility of the rehabilitation contractor who will order the clearance inspection from a certified lead base paint inspector/assessor and in accordance with §35.1340(b).
